Battery take-back

- Batteries must not be discarded into domestic waste.
- The consumer is legally required to return batteries after use, e.g. to public collecting centers or to battery distributors.
- Contaminant-containing batteries are labeled with the sign "crossed-out trashcan" and one of the chemical symbols. Used batteries should be disposed environmentally friendly and should not be discarded into domestic waste. Your dealer is legally required to take back old batteries.

Rechargeable battery notes

- Rechargeable batteries should not be played with by children. Never leave rechargeable batteries lying around; they could be swallowed by children or pets.
- Rechargeable batteries must never be short-circuited, disassembled or thrown into fire. This leads to a danger of explosion!
- Leaking or damaged rechargeable batteries can cause chemical burns when they come into contact with skin. For this reason, please make use of suitable protective gloves.
- Rechargeable batteries should only be replaced by structurally identical rechargeable batteries from the same manufacturer. Normal batteries must not be used since these are not rechargeable.
- Make sure the rechargeable batteries are inserted with the correct polarity.
- For long periods of time of non-use (for example, storage), remove the inserted rechargeable batteries to avoid damages via the leaking rechargeable batteries.

Disposal:

Dear customer,
please cooperate in avoiding waste. When you intend to dispose of the product in future, please consider that it contains valuable raw materials suited for recycling.
Therefore, do not dispose it of with domestic waste but bring it to a collection point for the recycling of waste electrical and electronic equipment.

Thank you very much for your cooperation!

1. Introduction

Dear customer, we thank you for purchasing the Solar Globelight.

With this Solar Light you have purchased a product that complies with the latest and most up-to-date technology.

This product complies with the European and National Standards. The relevant certificates of conformity are deposited with the manufacturer.

To preserve this standard and in order to maintain safety you must adhere to the use instructions!

2. Security Instructions

- In the event of any problems arising or damage occurring from not following these instructions, the warranty is deemed cancelled.
- The manufacturer will not be held responsible for any claims or damages arising from the misuse of this product.
- For safety reasons and in order to maintain standards (CE) you are prohibited from altering or changing any component in the Solar Globelight.
- Please follow the instructions very carefully.
- For commercial applications due care and attention must be paid to the Health and Safety Standards in your jurisdiction.

3. Overview

The Solar Globelight has been designed for indoor and outdoor use and can even be used in ponds as a floating light. The solar module converts sunlight into electricity, which is then stored in the integral rechargeable battery pack. The light switches on automatically when it gets dark and turns itself off when it gets light or when the battery is fully discharged.

The Solar Globelight should not be used as a toy and should not be placed in chlorinated water.

Installation of the product must be in a sunny place.

Please Note: For best results you should try to ensure that the installation allows full access to the sun without shadow. The duration of lighting hours depends on the intensity as well as the duration of sunlight. In winter months the performance will be affected

4. Assembling your product

- Twirl the battery cover counterclockwise and remove the cover.
- Connect the battery-connectors and put the battery pack into the compartment again.
- Close the battery cover and take care of the position from the rubber ring.

The solar globelight is ready to use.

Positioning the unit

- With pedestal:** The pedestal is for secure positioning outside in the garden. In winter, you can turn the light so that the sunrays meet the solar module at the angle of 90 degrees.
- With spike:** For sticking into the ground as a garden or path light.
- Swimming:** As a swimming light for ponds.

5. Changing the rechargeable battery pack

Use only original battery pack from the manufacturer.

- Turn the battery cover counterclockwise and remove the cover.
- Remove the old battery connector. Connect the new battery connector and put the battery pack into the compartment again.
- Close the battery cover.

Please note used batteries must be disposed of carefully with regard to the environment and should NOT be put in the family waste.

6. Functionality Problems

Light does not switch on in darkness!

Another light source (a street light for example) simulates daylight and prevents the light from switching on automatically. Position the light in a darker place.

Light does not switch on at all or just for a short time

Battery packs are low or broken. Replace the rechargeable battery packs.

Water ingress into the battery case

Open the battery cover dry it and reclose it.

7. Technical Data

Light source:	light emission diode (LED)
Solar module:	ASI-solar cell
Lighting:	Max. 20 hours if battery pack is fully charged
Dimensions:	200 mm Diameter

Rechargeable battery:

- light color yellow, NiMh 2.4 V/600 mAh Manufacturer Art.-No.: 901009
- light colors white and 7 colors changing (black plug), NiMh 3.6 V/600 mAh Manufacturer Art.-No.: 901010
